SMARTEYE-Guest – How to log off a device from the internet manually – wired and open Wi-Fi

Log in / log out · https://www.studentinternet.eu/en/docs/english/login-out/how-to-log-off-a-device-from-the-internet-manually-wired-and-open-wi-fi-studenteninternet123/

Logging off a device manually is only possible with a wired connection and open open Wi-Fi **SMARTEYE-Guest**

Logging off occurs immediately and without delay in this case:

- Logging off **your own device**:
  Surf to **http://hotspot.studenteninternet.be** or **http://hotspot.smarteye.eu** and click on “log off”
  *This only logs off your **current** device*
- Logging off your sessions from **a random device** (e.g. from home).
  Surf to My Dashboard
  *- Click on the red cross next to **logged in***
  ***-** An overview of the locations on which you are logged in appears. By clicking on **confirm** all your open sessions via the wired connection or the open Wi-Fi **SMARTEYE-Guest** will be logged off immediately.*
