Unlimited data

Usage · https://www.studentinternet.eu/en/docs/english/usage/unlimited-data/

The offer of the Internet with limitless data service falls under a fair-use policy and is meant for personal and private use by the end user.

The monthly basic data download limit is guaranteed up to the level shown in **My Dashboard**. The fair-use of the service is not guaranteed in case of fraud, unfair usage, usage whereby the rights (intellectual rights to be precise) of third parties are damaged or usage that boils down to abuse of law in judicial sense.

If you have reached the limit of your data you will be informed of this the next time you log in.

You can increase the level of data in **My Dashboard** at **no extra cost** up to the maximum allowed in the fair-use policy of your subscription. After reaching the set maximum, you will receive a message to contact our service-desk if you further wish to increase the set data limit.
